

## **PROJECT PROGRESS REPORT - III**

**Project Title:** Farming Assistance Services

**Area of Work:** Web Application Development

**Project Objectives:**

- To develop and create and create a digital platform that provides valuable support and resources to the farmers, agricultural workers, and stakeholders in the agricultural industry which could address various challenges and needs within the farming sector.
- To facilitate connections between farmers and potential buyers such as wholesalers, retailers and consumers.
- To reduce the cost and develop an economical and user-friendly GUI application.
- To provide suggestions based on a current world to eliminate the need to translate the full term.

**Work Completed:**

- The User Login frontend module is ready.
- The farmer login frontend part is ready.
- The authentication page has been designed.
- The welcome page is designed.
- The complaint page is designed.
- The frontend part is 68% ready.
- 60% backend part has been done.

**Work in Progress:**

- The work on database started started.
- The work on connection of the database is to be done.
- Working on other modules as well.

**Percentage of Work Done:** 78% of the work has been done.

**Difficulties:**

- Facing error in recently designed modules.
- Facing problem in python backend language so using PHP as an alternative.
- Database connectivity issue.

**Team Members:**

- Shruti Saumya (2001220130113)
- Vrishi Raj Kesarwani (2001220130130)
