PROJECT PROGRESS REPORT - II

Project Title: Farming Assistance Services

Area of Work: Web Application Development

Project Objectives:

1. To develop and create and create a digital platform that provides valuable support and resources to the farmers, agricultural workers, and stakeholders in the agricultural industry which could address various challenges and needs within the farming sector.
2. To facilitate connections between farmers and potential buyers such as wholesalers, retailers and consumers.
3. To reduce the cost and develop an economical and user-friendly GUI application.
4. To provide suggestions based on a current world to eliminate the need to translate the full term.

Work Completed:

1. The User Login frontend module is ready.
2. The farmer login frontend part is ready.
3. The authentication page has been designed.
4. The welcome page is designed.
5. The complaint page is designed.
6. The frontend part is 68% ready.

Work in Progress:

1. The work on backend part has been started.
2. The interfacing part is to be made.
3. Working on other modules as well.

Modules Developed:

1. Login Page (A login page module handles user authentication by verifying credentials and granting access to authorized users)
2. Farmer adding process(The farmer adding process module enables administrators to register and manage farmer details in the system.)

Percentage of Work Done: 70% of the work has been done.

Difficulties:

1. Facing error in recently designed modules.
2. Facing problem in python backend language so using PHP as an alternative.
3. Interfacing issues.

Team Members:

1. Aviral Jaiswal (2101220100035)
2. Himanshu Singh Chauhan (2101220100054)

Project Guide:

Er. Abhishek Dubey

Project Coordinator:

Er. Sarika Singh
